

RAMAKRISHNA MISSION VIDYAMANDIRA

(Residential Autonomous College under University of Calcutta)

FIRST YEAR

B.A./B.SC. SECOND SEMESTER (January – June), 2012

Mid-Semester Examination, March 2012

Date : 21/03/2012

STATISTICS (General)

Time : 11 am – 12 noon

Paper : II

Full Marks : 25

1. Answer **any two** questions : [2×5]
 - a) Define correlation coefficient and show that its value lies between -1 and $+1$.
 - b) Show that Spearman's Rank correlation coefficient is actually the simple product moment correlation coefficient between the two series of ranks.
 - c) Find out the angle between the two regression lines and interpret the cases when $r = 0$ and $r = \pm 1$.
2. Write down the probability density function and mean of the following random variables clearly mentioning the range and parameter restrictions : (any five) [2×5]
 - a) Exponential
 - b) Laplace
 - c) Beta - first kind
 - d) Beta – 2nd kind
 - e) Pareto
 - f) Log-normal
 - g) Cauchy
 - h) Gamma
 - i) Logistic
3. Show that $E(X) = E(E(X|Y))$ and $V(X) = E(V(X|Y)) + V(E(X|Y))$ [2+3]
